Abstract:

Sweeney Todd is a play that was established in the early 20th century in Britain. In this play we have seen the problem that occurred which the society has faced because of the rise of the bourgeoisie where they only think of their own benefits. In this paper, we will discuss how Mrs. Lovett helped Sweeney Todd and what are the reasons that pushed her to commit such actions. We will analyze her from Maslow and Murphy's point of view, we also will point to the role of the hierarchy of needs on her actions, which will become reasonable after this paper.
