ABSTRACT

Socio-economic and ecological research in recent decades in the border areas and issues have been the focus of many. It is the desire and passion that emanates the same economic zones and in convergence between countries may be Neighbor.

The border markets play an important role in economic and social development in the border plays. In recent years, cross-border markets in the country a special place in terms of economic value due to conditions. Including hundreds of kilometers of borders with neighboring countries have found. Among the reasons for the establishment of border markets through the development of trade is increasing security index.

As a lever to create jobs and develop trade relations with neighboring countries is. And in recent years the country has consistently had a significant impact on economic activity. In fact, with the creation of these markets, while local people an incentive to stay in these areas will be provided. Factor also increases security.

The research method in this study is based on descriptive and analytical method is based on library studies. The nearest town to the capital city of Mehran border of Iraq and its pilgrimage sites. Today, as the focus of export activity and the movement of pilgrims with neighboring countries is. At the same time one Mehran border market is active markets. Sfrmrzy point in ۸۲ years with different purposes, including enhancing the value of its exports.

Despite the natural factors and the geographical location of the region, security development in this area was formed which today has important advantages such as Exchange technology is to create jobs and expand cooperation with Iraq. On the other hand, Mehran border market activities created direct and indirect employment. Job mobility has also border the share of indirect employment is far greater than the direct employment.

Keywords: border markets, border city of Mehran, frontiersman.

۱. INTRODUCTION

Feedback centers are now new buildings to meet the needs of buyers and improve the economy, create can be shared between multiple classes. In this regard, considering the economic, social, engineering, finance, legal, humanitarian, cultural, graphics, etc. is important.

Full attention to this cause until after construction had a good performance. And interest accrue to the users and manufacturers. These centers will definitely appeal to more buyers will be specifically described. Mehran city in Ilam province is one of the counties in the '۶۰'s because of the war and its accompanying events. And in the ۸۰'s because of finding and buying and selling foreign goods and domestic and establishing border markets, demographic changes dramatically.
