ABSTRACT

In all phenomena and between component and relation between phenomena, an essential component of discipline is dominant. Cannot consider a case in which there is not discipline. In human relation also there is discipline. By discipline we mean "law" dominated everything. Those which are accordance and those which are not accordance with our wishes. If we think otherwise, certainly we have problem. To solve every problem we must understand that special law dominated on it. Discipline is key principal to achieve goals in every organization. When men pay more attention to concept and function of Law in life, he can understand its importance. Discipline means everything were in its place. The world around us that spread out the earth and sky is a regulated collection. Discipline dominated all the trends and events of the world, the world that we see and we feel.

INTRODUCTION

Run the broken windows theory.

Man is also a part of this regulated world. Natural human life has discipline too. All movement and interactions in human body consisting circulation, heart rate and breathing the lungs have a special discipline. Regular performance let man use every things in best way so the world around can be harmonic. If there is a erratic and indiscipline in human body it called disease. Exactly this trend can be found in human behaviour (whether in individual or in social behaviour life), so discipline is key part. Discipline is the valuable concept for individual and social life. If discipline ignored best and successful organizations will be ruined or all positive properties become worthless. Discipline is as important as Imam Ali said as for that: recommended you and all of my children and who read my letter to keep in mind the God and discipline in functions. It should be noted that real discipline dominated when rules of each issue observed. Because courtesy rooted in faith, if religion rules run in society; more discipline lasted in it. One of the new theories that have been paying special attention to the phenomenon of discipline is the broken windows theory that meant to regulate the affairs discussed. This theory is a thoughtful product of two American criminologist wilson and Kiling. These theorists said, crime is the result of chaos. In brief, the broken window theory said: don't pay attention to discipline disorders and ruin function caused big crime. With pay careful attention to this abstract, we want to explain discipline meaning and its effect in organizations in the shadow of broken window theory in this paper. Discipline means order, decorate, organize and unity. This word literally means equalize something with something

else in simple word, arrange everything is discipline. Discipline has clear meaning ,and it is opposite of anarchy, in literature means gathering, enclosure, adornment, making harmony, continuity and arrange the order of time or number or place of work. Sobhani et a.al(1994)said: discipline means a Kind of relationship and cooperation between the members of a collection in order to achieve a certain purpose, so that every part of it complete other parts so if one part don't work right other part has problem. Salari et al. (2005) said 'Discipline in natural phenomena is gathering component in terms of quality and quantity to achieve certain goal'. In dictionary "discipline" is synonyms with Training, control ,discipline, supervision, a sense of obedience, obedience temper, settle down, arrangement and order, lack of chaos, inobservance of, laws ,be consistent and pay attention to discipline. (Dehkhoda dic, 1963). So we can say discipline is the outcome of order. From these concepts we can concluded that order and discipline means training in order to making discipline and sense of duty in individuals, and if members violate, punishment done. In most of human resources literature, order and discipline is synonyms with punishment, it must be used when other tools failed (Mirsepasi 2011).

Need of discipline

Discipline is the life law and because of that function and behaviors shaped and every one would know how to live according to particular standard and how to use its own time in best way (Javadi Amoli 1985). Since human being has a various trends, and there are different trends in society so the only way is Loyalty and practice of law and respect for the rights of others. So Imam Ali said: best mores is knowing limitation and don't exceeded on that (Falsafi 2000). Although discipline was seen in man's appearance
