In this paper, we argue that creativity is necessary for the development of young students in the classroom. Creativity is the ability to create something new and unique. In the process of creativity, students are encouraged to think outside the box and come up with new ideas. The paper outlines the importance of creativity in the classroom and how it can be fostered in students. The authors suggest that creativity is not just an innate ability but can be developed through education and practice. The paper concludes with a discussion on the benefits of creativity in the classroom and how it can be integrated into the curriculum.
